

TECHNICAL INFORMATION DISOLVENTE M

Solvent used for cleaning motors and transformers from impregnation paints or epoxy / polyurethane resins and for cleaning workspace or packaging. The product removes impregnation or resin in a liquid or weak gel condition (when the drying process is not yet complete).

PROPERTIES

| | |
|---|-------|
| Viscosity at 20°C (mPa.s) | 0.4 |
| Density at 20°C (grs / cm ³) | 0.805 |
| Flammability (Product becomes flammable at temperature) (°C) | 4 |
| Boiling point at 760 mm Hg (°C) | 79, 6 |
| Vapor pressure at 20°C (mm Hg) | 70.2 |

PRECAUTIONS

- Easily flammable
- Harmful by inhalation and in contact to skin
- Irritating to eyes

PRESENTATION AND STORAGE

In metallic drums of 5, 25 and 200 liters
Store closed containers in a dry place and far off sun light or a heat source.
