

## TECHNICAL INFORMATIONS TAPE TECROLL 76SH

### PRODUCT DESCRIPTION

The tape is made of fiberglass covered with a layer of silicone adhesive hardening under the influence of heat (resistant thermally non-flammable adhesive for use at high temperatures). The tape is flexible, resistant to tearing and solvents. Recognized UL (E178430).

### APPLICATION

Recommended for fixing cables, closing coil insulation and transformers, insulating cores, layers and zones.

### CHARACTERISTICS

Colour	white
Backing thickness (mm)	0,12 + - 10%
Total thickness (mm)	0,18 ± 10%
Breakdown voltage min. (kV)	2.0
Tensile strength (min) (N/cm)	200
Elongation at break min. (%)	8
Adhesion on steel (N/cm)	3.0 ± 0.5
Adhesive system	silicon
Thermal class	H - 180°C

### PACKAGE

The product is available in a roll with a length of 50 mb, standard widths: 12, 19 and 25 mm, dimensions from 10mm - 30mm.
