

TECHNICAL INFORMATION FISHPAPER INSULATION

PRODUCT DESCRIPTION

The insulation consists of pressboard coated with polyester film. Continuous operating temperature 130°C – thermal class B.

APPLICATION

The product is used in electric machines, mainly in low-voltage electric motors as well as in transformers and electrical equipment, especially recommended as a slot insulation, interfacial insulation.

PACKAGE

Product in rolls: 1m in height, originally packed 50kg with the possibility of unwrapping smaller quantities, dimensions 0.15 - 0.50mm.
