

## TECHNICAL INFORMATIONS THERNOMID AFA/50

### PRODUCT DESCRIPTION

AFA/50 is a flexible insulation laminate and consists of polyester film (PETP) covered on both sides with calendered aramid paper. This laminate can be easily inserted due to its good sliding characteristics. Also, it presents excellent resistance to abrasion and breakage.

### APPLICATION

Ideal for the construction and repair of all windings which must reach high demands of mechanical, dielectric and thermal resistance (slots and interfaces). Slot insulation, slot closure and interleaving winding in electrical drivers and generators. Layer insulation in dry type transformer.
